

Appendix 1 – Specification of Options

The pool configurator will consist of a user interface where end users make product choices to configure their pool. The pool configurator consists partly of an interactive 3D model of the configured pool and an interface where the choices are presented, see Image 1 below. The choices made in the configurator are summed up into a quote. Not all choices made by the end users during the configuration process will result in an adjustment of the 3D model. The chart below lists the choices that will be presented to the end user. The chart also shows what is visualized in the model.

Parameter to choose	Choices visualized in the model	Choices in the interface. The choices are included in the quote.
Pool depth	Only 1 pool depth is shown in the 3D model	Custom dimensions according to the customer's wishes
Pool length and width	4x6, 4x8, 5x10, 6x12	The same choices as visualized
Type of pool / Frame	Not visible in the 3D model	Thermo, Cast, Wood, Stainless Steel
Coping	Wood, Stone (Gray Granite) will be visible in the 3D model	15 different material options can be chosen in the interface
Liner	2 options will be visible in the 3D model	20 different material options can be chosen in the interface
Lighting	2 lamps in stainless steel or 2 lamps in white plastic	10 options including quantity
Inlet	2 inlets in stainless steel on the gable wall 2 inlets in white plastic on the gable wall	The same choices as visualized
Outlet	Wide drain in stainless steel on the gable wall Wide drain in white plastic on the gable wall	The same choices as visualized
	Not visible in the 3D model	6 different varieties

Jet stream & massage	End stairs full End stairs half Corner stairs Ladder	20 different ladder options
Pool cover	Pool cover (4 different options) Lamella Cover (motorized)	Pool cover (low, high, flat, dome) Safety cover Metal Lamella Roll-Up
Pump room	Not visible in the 3D model	Pump, Filter, Chemical dosing, Heat Pump
Accessories	Not visible in the 3D model	Shower, Pool vacuum, Test kit, Cleaning kit and the possibility for additional items

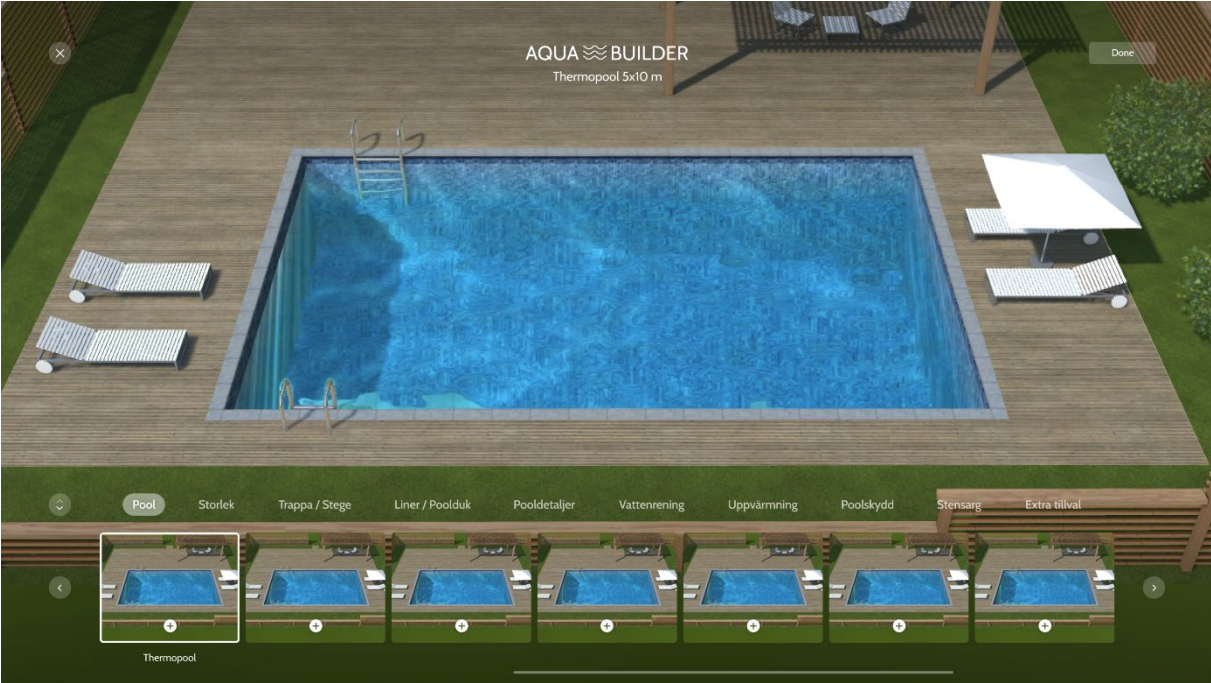

Image 1 - Example of the Pool Configurator*. The upper part represents an interactive 3D model while the lower section of the image shows the interface for choices.

*The image is only a concept and may change.
